Turnkey Engineering & Construction Solutions

A trusted execution partner for power, energy, and industrial infrastructure.

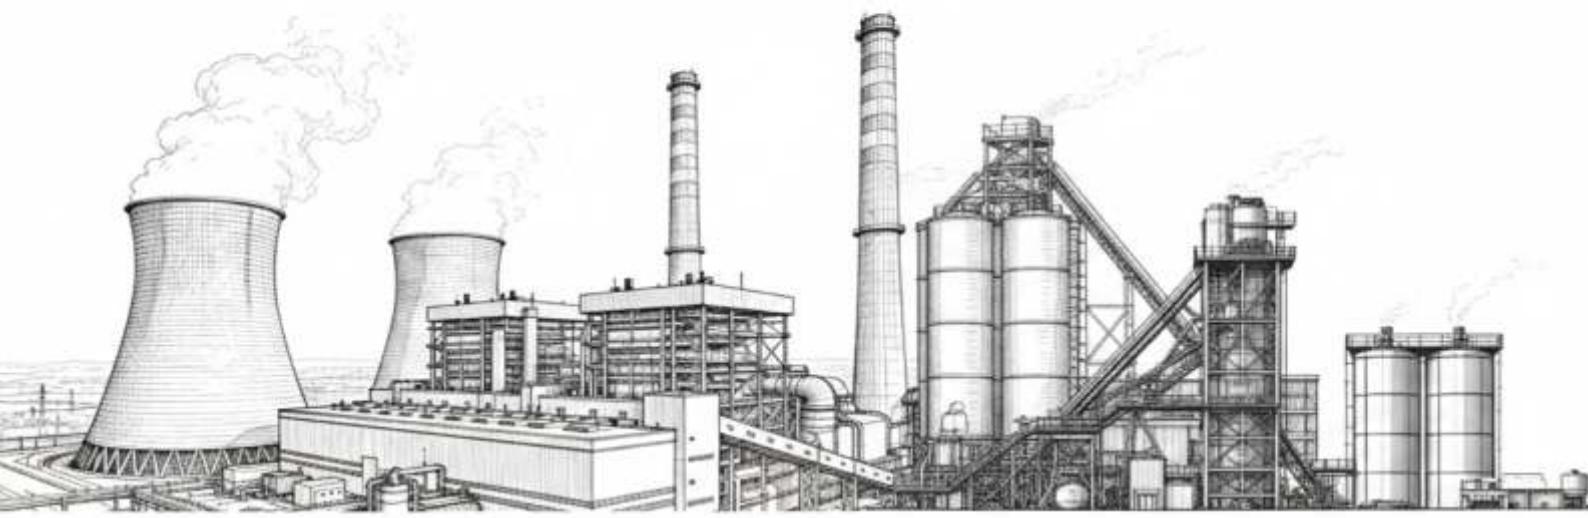

About Mech Marvel Engineers

Mech Marvel Engineers is synonymous with technical excellence and dependable project execution. Established in India in late 2017, the company has steadily grown into a capable turnkey engineering contractor serving the power, energy, and industrial infrastructure sectors.

Driven by engineering discipline and on-site execution strength, Mech Marvel Engineers consistently delivers complex projects by aligning design intent with practical construction methodology. Our ability to adapt to evolving industrial requirements and site challenges enables us to execute projects efficiently without compromising safety or quality.

The company is guided by a Management Committee comprising eminent professionals known for their education, integrity, and leadership, supported by a strong core team of engineers, supervisors, and skilled technicians.

ER. JITENDRA MALVADKAR (B -TECH MECH.)

Managing Director

A dynamic and result driven Managing Director with 15 Years' Experience. In Engineering Construction Industries. Holds Bachelor of Technology (B-TECH) in Mechanical engineering with Strong expertise in Project Execution, Business Development and Organizational Leadership. Successful managing Large Scale Project in Oil, power and Ethanol Industrial Sector Ensuring Timely Completions, Cost Control and Adherence Safety and Quality.

ER. AVINASH KADAM

Director

A Chemical Engineer with 20+ years experience of designing and troubleshooting of Power, Oil and Gas and Distillery Industries.

Mr. Avinash is continuously improving Project operations to conserve water as well as energy. Prior to Mech Marvel Engineering, he worked with reputed technology companies and executed projects in worldwide. His valuable international experience is always helpful to execute projects as per international quality and Design.

CA. YOGESH KATARIYA

Finance Adviser

He is one of the Important Person in Key Management of Mech Marvel Engineering Company. Is Chartered Accountant from ICAI and has an extensive post-qualification experience of 13+ years in the field of Direct Taxation (Income Tax), NRI Taxation, And Succession Planning also involved in managing various roles under his subject-level expertise. He is a Senior Partner in S P A Y & CO, a firm of Chartered Accountants based in Pune. He is working as Virtual CFO on many Startups and MSME. He is looking after all Finance, Taxation. He is Closely Monitoring company's Progress.

Our Approach & Differentiators

Our Engineering Philosophy

At Mech Marvel Engineers, we believe strong execution begins with clarity, planning, and control.

Execution-Focused Engineering	Designs are interpreted with constructability in mind
Strong Site Management	Experienced engineers and supervisors on every project
Schedule Discipline	Realistic planning with milestone-based execution
Safety-First Culture	Controlled lifting, welding, and testing practices
Cost-Conscious Delivery	Optimized resource utilization without quality compromise

Our Commitment

To deliver projects that meet technical expectations, timeline commitments, and long-term operational reliability.

OUR COMPREHENSIVE ERECTION SERVICES

Mech Marvel Engineers delivers end-to-end mechanical and structural solutions for power plants and industrial facilities. Our services are structured to support EPC contractors and asset owners through safe, efficient, and schedule-driven execution.

Power Plant Services

- Erection and commissioning of STG and Aux. With equipment and piping 270 MW. to 660 MW.
- Bop piping of power projects.
- Balance E&I work of power plant. (Lightning, Cable Laying, Cable Termination, Hopper Heater Erection.)
- STG HVAC Air washer unit, Fabrication Erection
- Coal Handling plant (CHP).
- Ash Handling System (AHP).
- All Plant structure work.
- Shutdown work of Power Project.

Oil & Gas Plant Services

- Equipment Erection
- Piping Work
- Structure Work
- Tank & Vessels fabrication and erection.

Testing & Commissioning Support

- Hydraulic Testing And System Flushing
- Mechanical Completion Assistance
- Pre-commissioning And Commissioning Support

Distillation, Evaporation & Drying

- Fabrication erection of Milling, Fermentation, Distillation, Evaporation and Dryer Section.
- Fabrication and Erection of Ethanol Storage Section.
- All Plant Sections Piping work.
- Cooling Water Inlet and Outlet piping.
- WTP, ETP CPU and Bio Gas Works.
- DDGS Storage Section Work.

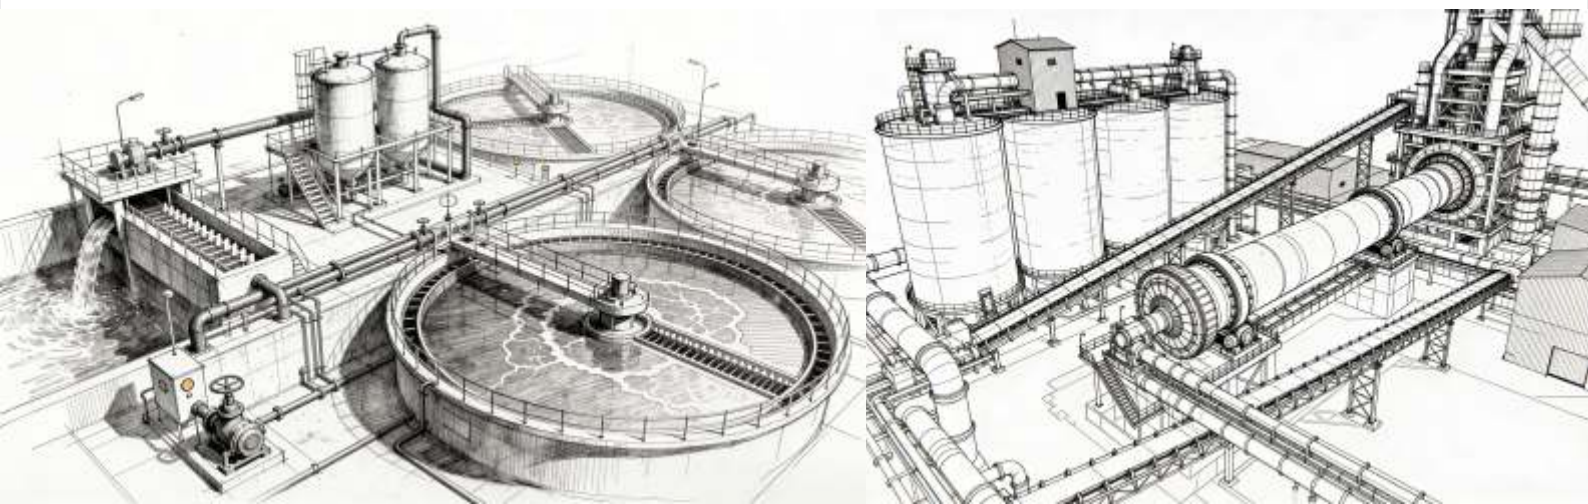

Piping & Ducting Systems

- High-pressure Piping
- Auxiliary Piping Systems (HP & LP)
- Fabrication And Erection Of Piping Supports And Ducts
- Under Ground Piping.
- Balance Plant Piping(BOP).
- FGD Piping

WATER TREATMENT SOLUTIONS

- Industrial Water Treatment
- Water Treatment Plant
- Condensate Water Treatment
- Effluent Treatment
- Industrial Effluent treatment plant

Our Service Capability Enables Us To Handle Complex Power And Industrial Projects With Confidence, Control, And Consistency.

EXECUTION CAPABILITY

Mech Marvel Engineers maintains a strong in-house fleet of machinery, tools, and welding infrastructure to ensure execution control and schedule reliability. Well Equipped workshop capacity of 1000 Ton production per month. Strong In-house Engineering And Site Teams.

Controlled Execution Under Critical Schedules. Capability To Perform In Greenfield And Brownfield Environments.

Workshop Production Capabilities

- 500 Mt Structure Manufacturing Per Month In House Capacity.
- Ss Tank, Vessels, Condenser And Special Equipment Fabrication Facility At Workshop.
- In House Blasting And Painting Facility

Mobile Cranes

- 20T, 18T, 15T, 14T, 12T Hydra fleet

Transport & Logistics

- Trailers, tractors, and site vehicles for material movement .
- This enables rapid mobilization, safe lifting operations, and continuous workflow at site.

Fabrication, Welding & Testing Infrastructure

- Heavy-duty pipe bending and cutting machines
- Advanced welding generators, rectifiers, MIG and inverter systems
- Hydraulic test pumps and temperature recording equipment

Client Advantage

- Minimal dependency on external resources
- Better control over quality and workmanship
- Faster response to site challenges
- Improved adherence to project timelines

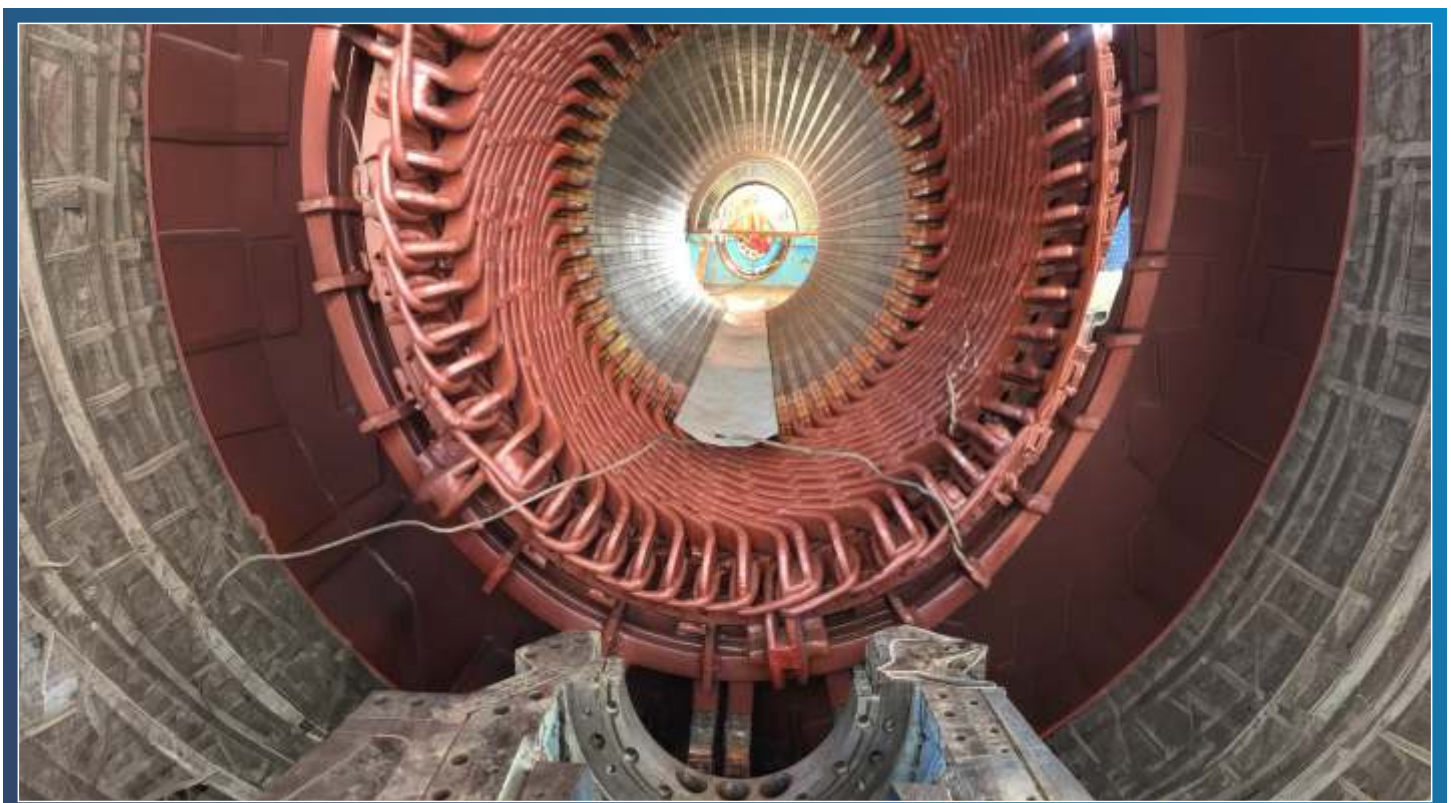

AWARDS

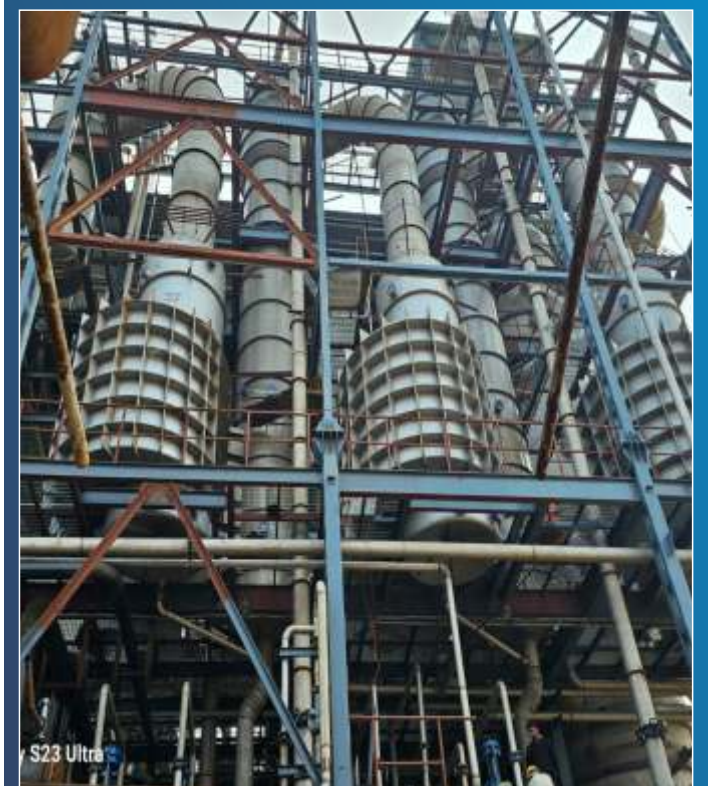

TURBINE ERECTION

Completed

2 x 270 MW BHEL, TSGENCO, Manuguru Project

PIPING PROJECTS

STRUCTURE WITH EQUIPMENT ERECTION

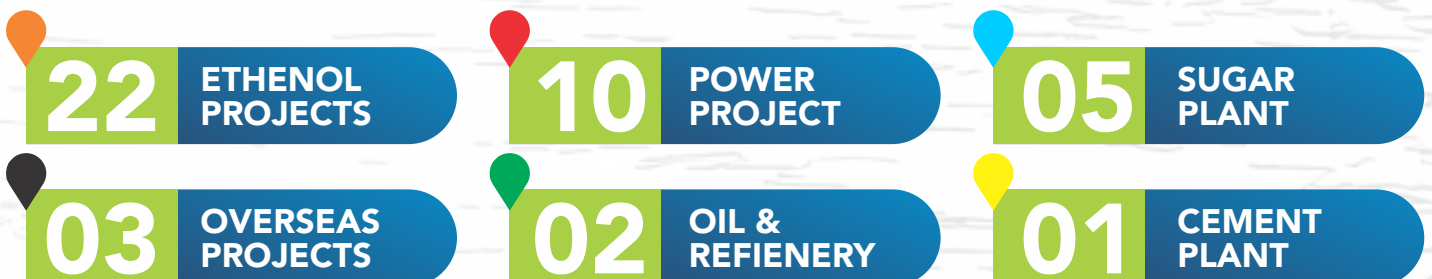

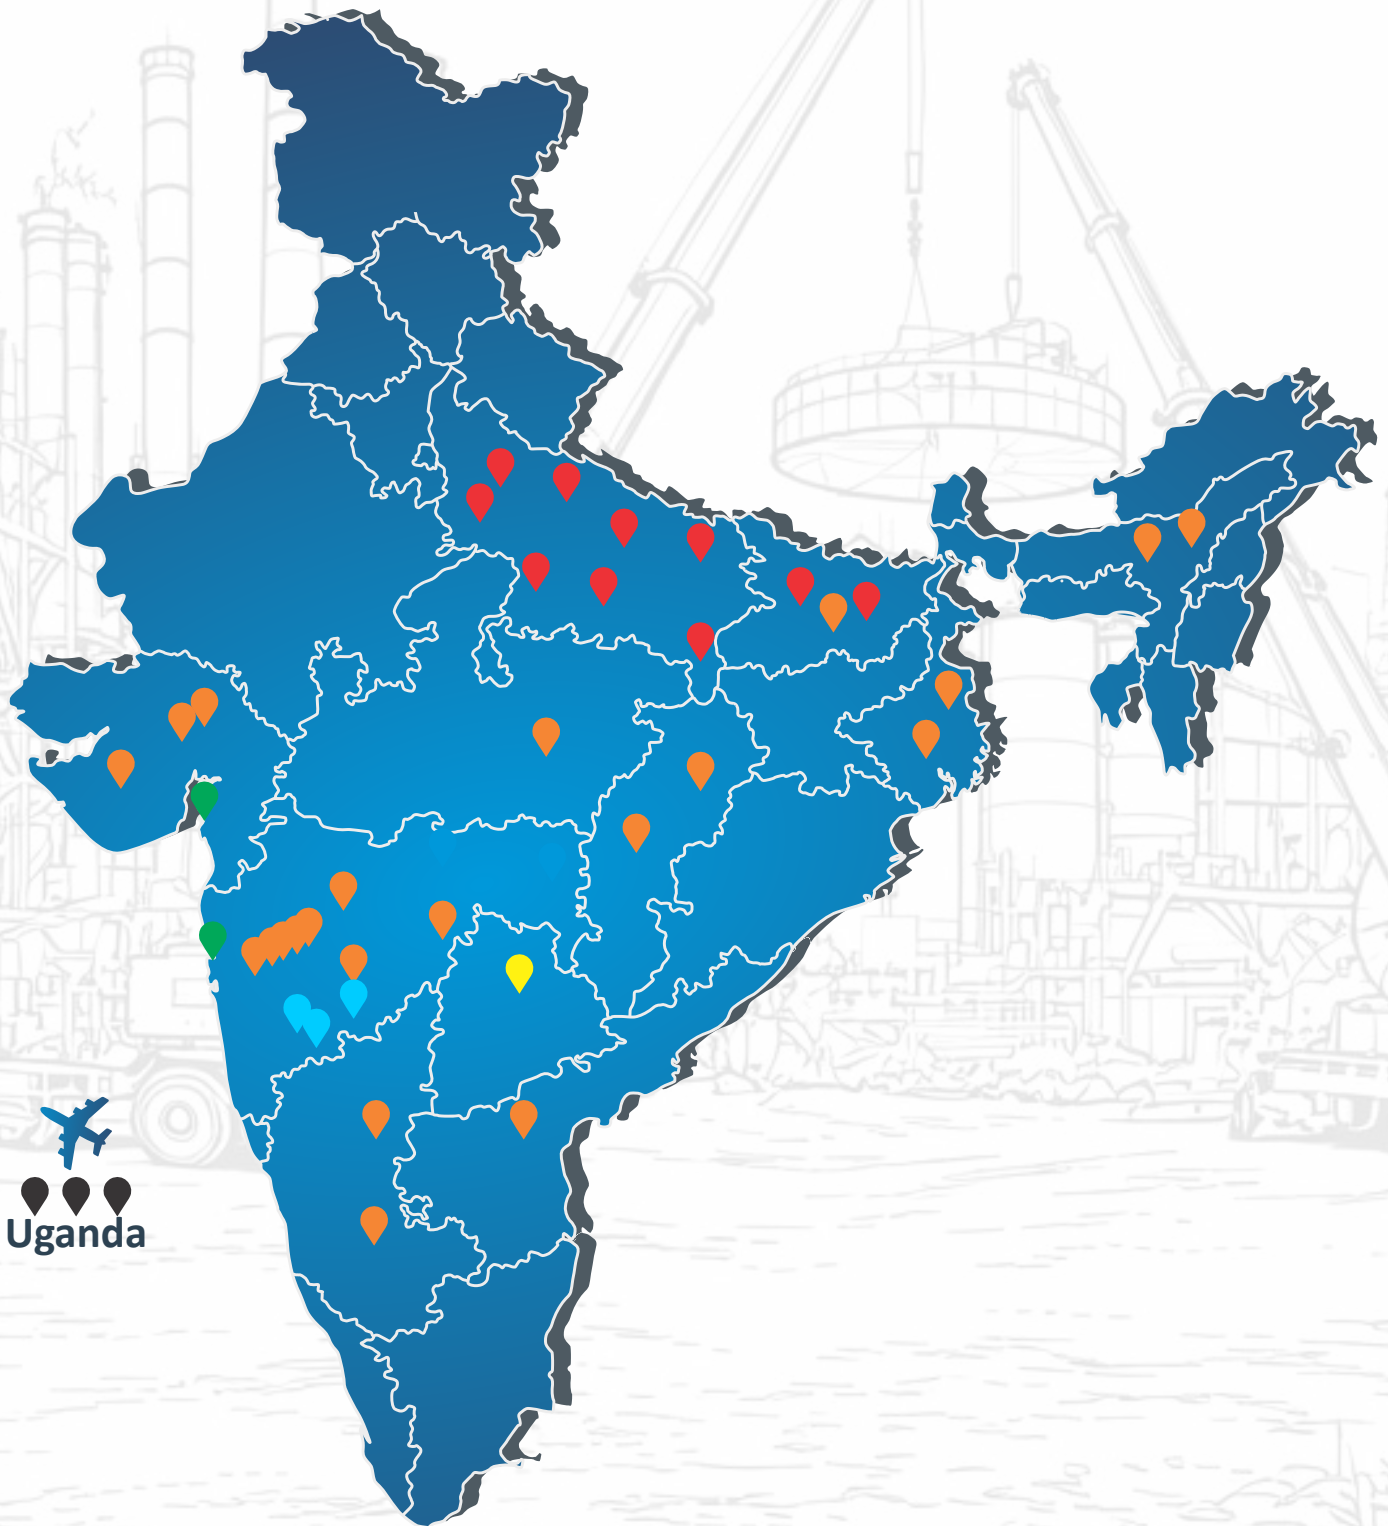

WHAT OUR PROJECTS REFLECT

- Ability to work under live plant and shutdown conditions
- Coordination with multiple agencies and OEMs
- Compliance with stringent quality and safety standards
- Execution in time-critical and high-risk environments
